

Make Your Own Museum

These holidays, take your family on a virtual tour of our Museum and get inspired to make your very own museum at home.

You will need:

- Cardboard;
- Glue;
- Paper;
- Pencil or pen;
- Printer;
- Scissors;
- Smartphone or flashlight; and
- Tape.

Make Your Own Museum

To create:

1. **Take a virtual tour** and explore our galleries—get inspired to make your own museum at home.
2. Have a think about what you liked best about our galleries—an object, photograph or work of art. Draw it, then cut it out so you can include it in your own museum.
3. When you've finished drawing and cutting out, close your eyes, open them anew and find things in your home that could be part of your museum.
4. Cut out the Kiddush Cup below and see if you can find something in your home just like it, then create a display label for each item.
5. Print-out our display label template and write in the details of your museum artwork or object—this can be serious or silly, fascinating or fake.
6. Use tape to stick your display label next to where your museum artwork or object lives.
7. Now find something in your museum that deserves its own special display case and use these instructions to create a case.
